PROJECTS

StockWatch: Unveiling Trends with Web Scraping

StockWatch, a dynamic platform built on MERN Stack, extracts real-time stock market data using Selenium and Python. Stay informed about stock trends and receive SMS alerts for user-defined goals like NIFTY reaching month's high.

AI Models with OpenAI APIs

Step into the future with AI Wonderland! Explore the capabilities of OpenAI through projects like GPT Magic for enchanting conversations, DALL-E Dreams for artistic creations, and VoiceCraft for transforming text to speech

EduHub Learning Management System

Empower your education journey with EduHub, a comprehensive Learning Management System. Admins can effortlessly create courses, add content, and integrate video tutorials. With advanced features like authentication, file management, and Stripe integration, EduHub transforms online education.

EDUCATION

MS Ramaiah Institute of Technology

B.E in CSE with AI and ML
2022-26
